
Reflex Protect is the highly effective, yet non-violent alternative for violent situations.

When seconds count and police are minutes away, Reflex Protect is the safest and most accurate self-defense spray.

Unlike conventional pepper sprays, Reflex Protect uses Presidia Gel (CS) that sticks to what it hits and won't affect someone who has not had direct contact with the product.

Reflex Protect

Self-Defense Products

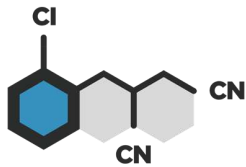

www.ReflexProtect.com

WHY US

Simple.

Effective.

Non-Lethal.

Reflex Protect is a safety company that provides a non-lethal self-defense spray and violence response training for use at home and in the workplace. We offer a highly effective, yet non-violent alternative for violent situations.

How it Works

3 simple steps to use Reflex Protect®

Step 1

Hold canister in a two-handed grip with nozzle facing target.

Step 2

Firmly press your index finger against the trigger block, allowing it to pop free.

Step 3

Push the thumb safety up and forward. Squeeze the trigger, aiming for the target's eyes.

TESTIMONIALS

"I arrive at work around 4:45 AM and recently have felt very uncomfortable walking into work. When I saw the announcement of Missoula using this product in our schools and Shawn telling me that it's available for St. Patrick Hospital employees to purchase – I knew in an instant that I would not be afraid to park on campus and walk into work in the wee hours of the morning with such a great product. (I had just been thinking of going to local shops to see about buying some bear spray.)"

- Connie McLaughlin
Nurse St. Patrick's Hospital

"You have a great product! I have talked it up to everyone I know. I have a personal canister and I ordered one for my mother. I will be sending one to my sister next. Thank you again for developing it [Reflex Protect] and for working with MCT to help our employees feel safer and more prepared."

- Theresa Jenson
Technical Director MCT Center for the Performing Arts
